CONTRACT

THIS CONTRACT is made and entered into between Doyon Utilities, LLC ("Owner") and TAB/TSI CONSTRUCTION LLC ("Contractor"), on the day the Contract is signed as accepted by Owner, Doyon Utilities, LLC.

ARTICLE I - GENERAL PROVISIONS

A. OFFER.

The applicable project is to be known as FORT WAINWRIGHT and generally is described as follows:

INSTALL NEW WATER, WASTEWATER, & HEAT
DISTRIBUTION SYSTEMS TO THE FTW 330A
AIRCRAFT STORAGE FACILITY, AS SHOWN PER
DWGS & SPECIFICATION IN THE DU IFC PACKAGE
FOR FTW 330A.

The Contractor understands and agrees that the work shall consist of the construction described in the project specifications attached hereto and made part hereof, and that all work shall be in strict accordance with the Plans, Specifications, and Construction Drawings.

B. OWNER-FURNISHED MATERIALS.

Contractor understands and agrees that the Owner will furnish to the Contractor the material set forth in the attached "list of Furnished Owner's Material" and the Contractor will give a written receipt for Material Received. Contractor will, on behalf of the Owner, accept delivery of such of the material as may be subsequently delivered and will promptly forward to the Owner the Contractor's receipt in writing for such materials. The materials referred to are on hand at, or will be delivered to, the locations specified in the Lists and the Contractor will use such materials in constructing the Project.

Owner shall not be obligated to furnish materials in excess of the quantities, size, kind and type set forth in the attached Lists. If the Owner furnishes, and the Contractor accepts, materials in excess thereof, the values of such excess materials shall be their actual cost as stated by the Owner. Information on the shipping schedules of materials not on hand at the start of the project will be furnished to the Contractor as necessary during progress of the work. Upon delivery, Contractor promptly shall receive, unload, transport and handle all materials and equipment delivered after the Notice to Proceed (NTP) at its expense, and shall be responsible for demurrage, if any.

All retired materials must be returned to the Owner. Contractor's failure to return retired materials will result in Owner retaining a portion of the payment otherwise due under the Contract.

C. PURCHASE OF MATERIALS NOT FURNISHED BY OWNER.

Contractor will purchase all materials and equipment (other than owner-furnished materials) outright and not subject to any conditional sales agreements, bailment, lease or other agreement reserving unto the seller any right, title, or interest therein. All such materials and equipment shall become the property of the Owner when erected in place.

D. BIDS ON UNIT BASIS.

Contractor understands and agrees that the various Construction Units on which bids are made are defined by numbers, symbols, and descriptions and that all said bids are on a unit basis, and that the Owner may specify any number or combination of Construction Units that the Owner may deem necessary for the construction of the Project. Separate Construction Units are designated for each different arrangement that may be used in the construction of the Project. The bid is based on a consideration of each unit in place and includes only the materials listed on the corresponding Construction Drawings or description of unit where no drawing exists.

E. FAMILIARITY WITH CONDITIONS.

The Contractor has made a careful examination of the site of the Project to be constructed and of the Plans, Specifications, Construction Drawings, and form of Contractor's Bond attached hereto, and has become informed as to the location and nature of the proposed construction, the transportation facilities, the kind and character of soil and terrain to be encountered, and the kind of facilities required before and during the construction of the Project, and has become acquainted with the labor conditions, state and local laws and regulations which would affect work on the proposed construction.

F. CONTRACTOR LICENSING.

A Contractor's License is required for this Project. Contractor holds License # 28671 in the State of Alaska, and the license expires 12/31/10.

G. CONTRACTOR WARRANTY.

1. Contractor warrants that the bid is made in good faith and without collusion or connection with any person or persons bidding for the same work.
2. Contractor warrants that in the event the bid is accepted it will make available for use in connection with the proposed construction all necessary tools and equipment and qualified superintendents and foremen.
3. Contractor warrants that each and all of the covenants and agreements herein contained shall extend to and be binding upon the successors and assigns of the parties hereto.
4. Contractor warrants that it possesses adequate financial resources and agrees that in the event this Proposal is accepted it will furnish a Contractor's Bond with a surety in the form attached hereto, in a penal sum not less than the maximum Contractor price.

In the event that the surety or sureties on the performance bond delivered to the Owner contemporaneously with the execution of the Contract or on any bond or bonds delivered in substitution thereof or in addition thereto shall at any time become unsatisfactory to the Owner the Contractor agrees to deliver to the Owner another or an additional bond.

H. TAXES.

The unit prices for Construction Units in this bid include provisions for the payment of all monies which will be payable by the Contractor or the Owner in connection with the construction of the Project due to taxes imposed by any taxing authority upon the sale, purchase or use of materials, supplies and equipment, or services or labor of installation thereof, to be incorporated in the Project as part of such Construction Units. The Contractor agrees to pay all such taxes, except taxes upon the sale, purchase or use of owner-furnished materials. As to owner-furnished materials, the values stated in the attached "Owner Supplied Material" include taxes upon the sale, purchase or use of owner-furnished materials, if applicable. Upon consent of Owner, the Contractor will furnish to the appropriate taxing authorities all required information and reports pertaining to the Project, except as to the owner-furnished materials.

I. CHANGES IN QUANTITIES.

The Contractor understands and agrees that the quantities called for in the bid, if any, are subject to change, and that the total number of units upon which payment shall be made shall be as set forth in the final agreed inventory. If the Owner changes the quantity of any units specified in this bid, and the materials cost to the Contractor is increased thereby to an extent which would not be adequately compensated by application of the unit prices in this bid to the revised quantity of such unit(s), such change, to the extent of the quantities of such unit(s) shall be regarded as a change in the construction within.

ARTICLE II -- CONSTRUCTION

A. TIME AND MANNER OF CONSTRUCTION

1. Commencement Date.

The Contract shall commence on the date the contract is signed by the owner. The contractor shall submit all required documents (ie; bonding, insurance, storm water prevention plans, safety plan, quality control plan, schedule of values) within the time frame set by the owner. Upon review and acceptance of the documentation required, the owner shall issue in writing a Notice To Proceed, (NTP). Upon receipt of the NTP the contractor shall proceed with due diligence and in a workman like manner begin work in accordance with the schedule of events. The Contractor further agrees to complete construction in strict accordance with the Plans, Specifications and Construction Drawings within the preceding prescribed Date.

2. Time for Completion

a. General Requirements.

Subject to delay provisions, the Contractor shall complete the work herein on or before the date, or within the time period, specified in the attachments. Contractor shall also complete any other thing in the performance of the Contract on or before the dates, or within the periods, specified in the approved schedule.

Prior to commencement of work, the Contractor shall prepare and submit to the Project Manager for approval a schedule of work setting out in such manner as the Project Manager may reasonably require the sequence in which and dates by which the Contractor proposes to perform his obligations under the Contract. If the program submitted by the Contractor accords with any dates and periods specified in the Contract and is otherwise reasonable, upon approval by the Project Manager it shall be the Approved Schedule.

The Contractor shall use all reasonable efforts to perform obligations under the Contract in accordance with the provisions of the Approved Schedule. If at any time the performance of the Contract falls behind the approved schedule, or it becomes clear that it will fall behind, then the Project Manager may require the Contractor either to take such steps as may be practicable in order to achieve the approved schedule or to revise the approved schedule in the light of the circumstances and to re-submit it for approval. If the Project Manager approves the revised schedule it shall thereafter be the Approved Schedule.

If the Project Manager decides that the rate of progress by the Contractor in performing the Contract is likely to prejudice the Contractor's ability to complete the work, and this is due to a cause for which the Contractor is responsible, the Project Manager may give notice to that effect to the Contractor. Following such notice the Contractor shall use best efforts to remedy the potential delay at its own cost.

If when the Project Manager requires the Contractor to revise the Approved Schedule, the Contractor fails to submit such revised schedule within a reasonable time, or if the Contractor submits a revised schedule which the Project Manager is unable to approve for good reason, the Project Manager may instruct the Contractor in writing to make reasonable revisions to the schedule and the Contractor shall forthwith make such revisions and the revised schedule shall thereafter be the Approved Schedule.

The exercise of this Section by the Project Manager or Owner shall not affect any of the Contractor's obligations to perform the Contract.

b. Extension of Time for Completion for Force Majeure

The Time for Completion of construction shall be extended for the period of any reasonable delay which is due exclusively to causes beyond the control and without the fault of the Contractor, including Acts of God, fires, floods, inability to obtain materials and acts or omissions of the Owner with respect to matters for which the Owner is solely responsible. No delay in such time of completion or in the progress of the work which results from any of the above causes except acts or omissions of the Owner, shall result in any liability on the part of the Owner, and if this provision conflicts with Owner's remedies under Article IV below, Article IV controls.

c. Extension of time for Completion for Weather

The Time for Completion of construction may be extended when, in the judgment of the Contractor, snow, rain, or wind, or the results of snow, rain, or wind make it impracticable or unsafe to perform any required operation or construction. If lost time arising from such weather conditions effects the ability to meet the construction deadline, the Contractor may make a written request for an extension of the construction deadline, and the Owner will issue a written approval to the extent necessary. Such requests may not be granted when, in the judgment of the Owner, the request is not reasonably related to weather conditions, but is related to avoidable delays or other work stoppages within the control of the Contractor. The criteria used to determine whether an automatic one-day extension of time shall be allowed by the Owner for completion of the contract because of cold weather conditions are as follows:

- (1) When the temperature at 7:00 A.M. on a working day for the POST where the job site is located is -25 degrees Fahrenheit or colder, or
- (2) When blizzard conditions, excessive rain, or high wind exist in the work area, on a working day, such that it would be unsafe for the Contractor's workers to perform any required operations or construction under those conditions.

3. Changes in General

All changes with respect to performance of this Contract or the Contract price must be requested and accepted by both Parties, and will only be effective when changed by a written amendment specifically referring to the provision of the Contract to be modified, and upon signing of the written amendment by the Contractor and Owner. This provision applies to changes in scope of work, changes in contract price, and any and all other equitable adjustments request by either party.

4. Changes, Additions, or Subtractions from Plans.

The Owner may from time to time during the progress of the construction of the Project make such changes, additions to or subtractions from the Plans, Specifications, Construction Drawings, List of Materials and work schedule

provided for in the previous paragraph that are part of the Contractor's bid as conditions may warrant. Provided, however, that if any change in the construction to be done shall require an extension of time, a reasonable extension will be granted. Provided further, that if the cost to the Contractor is materially increased by any such change or addition, the Owner shall pay the Contractor for the reasonable cost thereof in accordance with a Change Order signed by the Owner and the Contractor.

5. Changes in Construction Previously Installed.

The Contractor agrees to make such changes in construction previously installed in the Project by the Contractor as required by the Owner for prices arrived at as follows:

- a. Where only a portion of the complete unit is affected by the change, the compensation for such change shall be as agreed upon in writing by the Contractor and the Owner prior to the commencement of work in connection with such change.
- b. For all other units, the compensation for such change shall be the reasonable cost thereof as agreed upon by the Contractor and the Owner.

No payment shall be made to the Contractor for materials or labor involved in correcting errors or omissions on the part of the Contractor that result in construction not in accordance with the Plans and Specifications.

6. Construction Not in bid

The Contractor also agrees that when it is necessary to construct units not shown in the bid it will construct such units for a price arrived after considering the cost of materials reflected on vendor invoices, and a reasonable cost of labor.

7. Contractor Claims

If the Contractor intends to claim any additional payment or equitable adjustment to the Contract Price which cannot be submitted as a Change, he shall notify the Owner of such intention at the earliest practicable opportunity and in any event not later than five working days after the occurrence of the event which gives rise to the claim, and shall establish and maintain contemporary records pertaining to it, together with such additional recourse as the Owner may direct. All such records shall be open to inspection by the Owner.

The Contractor shall as soon as possible thereafter submit his claim in the form of a written statement of grounds under the Contract and a summary of material facts upon which he relies to the Owner together with copies of contemporary records. The Owner may request any reasonable additional information that he considers necessary to evaluate the claim and the contractor shall provide such information as soon as reasonably practicable. The Owner shall consider such a

claim in relation to all the relevant circumstances and provisions of the Contract and shall notify the Contractor within a reasonable time of his conclusion and the reasons for it.

It shall be a condition precedent to the validity of the claim that the Contractor shall give notice of the claim as provided in the Contract and if the Contractor fails to do so he shall forfeit any right to additional payment or equitable adjustment with respect to the claim.

B. MATERIALS, STANDARDS, AND LOCATION

1. Materials and Access

- a. Storage of materials shall be within the easement limits or previously agreed upon lay down areas. Equipment and materials shall be stored and maintained in a manner as to not obstruct roads, driveways or trails. Any material stored on site shall be at the sole risk of the contractor, and any damaged material shall be replaced at no cost to the Owner.
- b. Substitutions of Owner-furnished materials are not allowed without Owner's prior approval. . For projects funded, in whole or in part, by funds granted under the American Recovery and Reinvestment Act of 2009 ("ARRA"), all of the iron, steel, and manufactured goods used in the project must be produced or manufactured in the United States, unless an appropriate waiver is obtained per 2 C.F.R. 176.10 *et seq.*
- c. The Contractor shall exercise care in the handling of all material. The Contractor shall not install any material found to be defective or damaged.
- d. The Contractor shall exercise care in handling factory subassemblies to prevent loss of components for which he is responsible.
- e. If materials are damaged due to Contractor's mishandling or faulty equipment, the Contractor shall replace the damaged sections, including furnishing of necessary materials, in a manner satisfactory and at no additional cost to the Owner. All sections of wire that are damaged by the application of grips shall be replaced.
- f. Equipment access to the right-of-way shall be from public right-of-ways and by the use of the adjacent easements only. Additional access may be gained by requesting authorization through Owner and/or the proper Army personnel.

- g. Equipment shall not be operated in such fashion as to cause rutting or undue disturbance to the ground cover over which it is operated, except as approved in writing by the Engineer.
- h. Additional arrangements for equipment access along other existing cleared paths may be made by the Contractor with concurrence with the Project Manager and the proper Government officials.
- i. When Contractor is working around survey monuments, lot corners or section corners, care shall be taken to protect these facilities from damage. If damage should occur during clearing or construction, the Contractor shall, at his own expense, re-establish the damaged survey monument using a Professional Land Surveyor registered in the State of Alaska.
- j. The Contractor shall provide a Safety Plan acceptable to Owner before work commences on the project.
- k. The Contractor shall provide a Quality Control (QC) plan acceptable to Owner before work commences on the project.
- L. The Contractor shall provide a Storm Water Prevention Plan (SWPPP) if required, acceptable to Owner before work commences on the project.

2. Standards of Work

- a. The work shall be performed in accordance with the plans, specifications, and construction drawings. Contractor will use adequate numbers of qualified personnel with suitable training, education, experience and skill to perform the Contract.
- b. The requirements of the latest pertinent OSHA Regulations shall be followed wherever applicable to the work, except where local regulations or specification requirements are more stringent, in which case the more stringent requirement shall govern.

3. Location of Structures and Appurtenances

Structures, anchors, access roads, and other major items to be constructed shall be placed in locations shown on the drawing provided. The Contractor shall be responsible for checking the location of structures and appurtenances to be installed. The Contractor shall direct any questions regarding the location of these items prior to installation.

4. Locates and Dig Permits

Contractor shall coordinate with Owner's Site Manager, and notify and obtain a dig permit from the Installation before any drilling, digging, or excavation is undertaken by Contractor. Permits will identify all underground utilities within two feet of the designated area. Since utility marking is an inherently imprecise process, excavation in close proximity to marked utilities will be done by hand in compliance with the Installation digging permit. Contractor shall be responsible for all repairs, costs, and damages due to excavations performed by Contractor that fail to comply with the Installation digging permit process and the requirements listed herein; this includes excavations extending beyond areas that have been cleared for excavation.

C. ACCIDENT REPORTING

Written notice of all on-the-job accidents shall be submitted within 24 hours to the Owner's Contract Administrator or Project Manager. Within one week, Contractor shall issue an accident report with copies of any and all reports, records or investigations of the accident. This provision also applies to any subcontractors of Contractor.

D. SUPERVISION AND INSPECTION

1. The Contractors shall cause the construction work on the Project to receive constant supervision by a competent Person (supervisor) who shall be present at all times during working hours where construction is being carried on. The Contractor shall also employ, in connection with the construction of the Project, capable, experienced and reliable foremen and such skilled workmen as may be required for the various classes of work to be performed.
2. The Owner reserves the right to require the removal from the Project of any employee of the Contractor if in the judgment of the Owner such removal shall be necessary in order to protect the interest of the Owner.
3. The manner of construction of the Project, and all materials and equipment used therein, shall be subject to the inspection, tests and approval of the Owner and the Contractor shall furnish all information required by the Owner concerning the nature or source of any materials incorporated or to be incorporated in the Project. The Owner shall have the right to inspect all payrolls, invoices of materials, and other data and records of the Contractor. Contractor shall have an authorized agent accompany the Engineer or Project Manager when final inspection is made and, if requested by the Owner, when any other inspection is made.
4. In the event that the Owner shall determine that the construction contains or may contain numerous defects, it shall be the duty of the Contractor and the Contractor's surety or sureties to have an inspection made by an engineer

approved by the Owner, at the cost of the Contractor or surety, for the purpose of determining the exact nature, extent and location of such defects.

5. The Engineer may recommend to the Owner that the Contractor suspend the work wholly or in part for such period or periods as the Engineer may deem necessary due to unsuitable weather or such other conditions as are considered unfavorable for the satisfactory prosecution of the work or because of the failure of the Contractor to comply with any of the provisions of the Contract. Provided, however, that the Contractor shall not suspend work pursuant to this provision without written authority from the Owner so to do. The time of completion hereinabove set forth shall be increased by the number of days of any such suspension, except when such suspension is due to the failure of the Contractor to comply with any of the provisions of this Contract. In the event that Contractor suspends work with consent of Owner, before resuming work, the Contractor shall give the Owner at least twenty-four (24) hours notice thereof in writing.

E. DEFECTIVE MATERIALS AND WORKMANSHIP.

1. The acceptance of any materials, equipment (except owner-furnished materials) or any workmanship by the Owner or the Engineer shall not preclude the subsequent rejection thereof if such materials, equipment, or workmanship shall be found to be defective after delivery or installation, and any such materials, equipment or workmanship found defective before final acceptance of the construction shall be replaced or remedied, as the case may be, by and at the expense of the Contractor. Any such condemned material or equipment shall be immediately removed from the site of the Project by the Contractor at the Contractor's expense. The Contractor shall not be entitled to any payment hereunder so long as any defective materials, equipment or workmanship in respect to the Project, of which the Contractor shall have had notice, shall not have been replaced or remedied, as the case may be.
2. Construction Guarantee/Warranty.
Notwithstanding any certificate which may have been given by the Owner or the Engineer, if any equipment, materials, or workmanship which does not comply with the requirements of this Contract shall be discovered within one (1) year after completion of the Project, the Contractor shall replace such defective equipment or materials or remedy any such defective workmanship within thirty (30) days after Owner provides written notice of the existence thereof. In the event of failure by the contractor so to do, the Owner may replace such defective equipment or materials or remedy such defective workmanship, as the case may be, and in such event the Contractor shall pay to the Owner the actual cost of remedying such condition. This provision does not apply to Owner-provided material.

ARTICLE III -- SPECIAL CONDITIONS

A. TRAFFIC CONTROL ALONG ROADWAYS.

1. The Contractor will be responsible for traffic maintenance along the project route. This work shall consist of the necessary measures to protect and maintain traffic during the life of the Contract, including the furnishing of such personnel, equipment, and devices as may be required to insure the safety of the traveling public.
2. If the construction of the Project will affect traffic flow or safety along roadways, the Contractor will be required to provide all applicable information to Owner Site Manager, Project Manager and/or Department of Public Works (DPW); including the formulation and submittal of traffic control plan. The traffic control plan shall be submitted in writing to the Project Manager for approval within 1 day of the Notice to Proceed. Changes in the traffic control plan resulting from unforeseen circumstances may be allowed by DPW construction provided forty-eight (24) hours are allowed for DPW review.
3. All Traffic control devices required in the traffic control plan, including construction signs and barricades shall be furnished by the Contractor. All such devices shall conform to the design, materials, color and fabrication requirements of the Alaska Traffic Manual. The construction signs and barricades shall be high intensity reflective sheeting as provided in DOTPF Standard Specifications Section 615.
4. Construction shall be conducted so as to cause as little inconvenience as possible to abutting property owners. The Contractor shall provide and maintain in a safe passable condition temporary crossing, and intersection with trails, streets, businesses, parking lots, residences, garages, and farms.
5. Should the DPW, notify the Owner or Contractor that conditions are such that the safety and/or convenience of the traveling public are adversely affected, the Contractor shall take immediate corrective action. In the event the Contractor neglects to take immediate corrective action, the Owner may suspend all work on the project until satisfactory action is performed.
6. Contractor shall furnish and effect, move and remove, as required and directed, the required construction signs, construction barricades and/or temporary guide markers and pavement marking required to adequately and safely inform and direct the traveling public.
7. All construction signs shall be kept clean, mounted at the required height, and placed to be effective day and night.

The cost of all signage, road closures, barricades, formulation of the traffic control plan, negotiations, meeting, and permit fees for this shall Project be the responsibility of the Contractor.

B. ENVIRONMENTAL PROTECTION.

The Contractor shall perform work in such a manner as to maximize preservation of beauty, conservation of natural resources and minimize marring and scarring of the landscape and silting of streams. The Contractor will properly dispose of all waste material and shall not deposit trash in streams or waterways, and shall not deposit herbicides or other chemicals or their containers in or near streams, waterways or pastures. The Contractor shall follow, under the general direction of the Project Manager, the criteria relating to environmental protection as specified herein by the Engineer.

If required, special Installation instructions will be attached as Appendix 3.

C. INSTALLATION ENVIRONMENTAL AND SAFETY GUIDELINES.

Services under this Contract require Contractor's knowledge of and compliance with Installation environmental and safety guidelines. Such compliance may be modified by the Installation from time to time, and includes but is not limited to:

1. Contractor shall comply with Installation procedures and standards for work in and around environmentally sensitive or contaminated property. Prior to accessing any environmentally sensitive areas, Contractor shall coordinate with the Project Manager and, if appropriate, the designated Government Representative.
2. Hazardous materials used in construction shall be handled in accordance with applicable laws and regulations. Appropriate Material Safety Data Sheets (MSDS) shall accompany all hazardous materials used on the Installation. Contractor shall submit copies of MSDS to Owner for provision to the Government, and Owner shall retain a copy of each MSDS on-site. Contractor shall maintain a viable hazardous waste minimization program that includes making every effort to identify non-hazardous or less hazardous materials than those currently in use and recycling versus disposing of consumable wastes.
3. Contractor shall be responsible for accomplishing at no cost environmental response required as a result of Contractor's activities. Contractor shall not be responsible for remediating preexisting environmental conditions. Unexploded ordnance and any biological, nuclear, or chemical warfare material shall be considered a preexisting environmental condition. Existing contamination due to spills or discharge of distillate, oil or other contaminants or toxic material shall also be considered a preexisting environmental condition.

D. ARCHAEOLOGICAL FINDING.

Cultural resources on Federal property are protected and managed by the Archaeological Resources Protection Act of 1979 and other applicable laws. Contractor shall exercise care so as not to disturb or damage artifacts or fossils should any be uncovered during Contractor activities. Should Contractor or its subcontractors discover evidence of possible scientific, prehistoric, historic or archaeological finds within the work limit lines or adjacent to the work area, Contractor shall immediately cease work at that location and notify Owner so Owner may notify the appropriate Contracting Officer. Contractor shall provide Owner with complete information as to the specific location and nature of the findings. Contractor shall continue work in other areas. Where appropriate by reason of discovery and pursuant to direction by the Government, Owner may order delays in time of performance or changes in the work or both. Should any temporary suspension of the work at the site result in delays or additional work for the Contractor, the Contractor will be compensated by an equitable adjustment under the General Provisions of the Contract.

ARTICLE IV - PAYMENTS AND RELEASE OF LIENS

A. PAYMENTS TO CONTRACTOR.

1. Contractor shall provide a schedule of values for progress payments along with the Invoice. To receive a Progress Payment, Contractor must submit an Owner-provided Pay Request Form, and attach the appropriate supporting documentation that reflects a Progress Payment is warranted under the approved schedule of values. Appropriate supporting documentation shall include: Purchase Order Number, Original Contract Amount, Change Order amount (if any), Amount Billed to Date, Amount of Invoice and Balance of Contract. All invoices shall be accompanied by an updated schedule of values and a percent complete. All invoices shall be sent to the Project Manager for review. If corrections is required or documentation has been omitted the Project Manager shall return the invoice for completion.
2. Owner will withhold up to 25% of the contract price pending final Completion and Acceptance of the work.
3. Completion and Acceptance shall include but not limited to: completed punch list, turnover of all manuals and instructions, complete any and all training required, submission of as-built drawings one hard copy and one in digital format, any GIS information required in Shapefiles or AutoCAD also in a digital format, any and all commissioning reports and all Quality Control reports.
4. No payment shall be due while the Contractor is in default in respect of any of the provisions of this Contract and the Owner may withhold from the Contractor the amount of any claim by a third party against either the Contractor or the Owner based upon an alleged failure of the Contractor to perform the work hereunder in accordance with the provisions of this Contract.

B. RELEASE OF LIENS AND CERTIFICATE OF CONTRACTOR

Upon the completion by the Contractor of the construction Project but prior to final payment to the Contractor, the Contractor shall deliver to the Owner releases of all liens and of rights to claim any lien, in the form attached hereto from all manufacturers, material men, and subcontractors furnishing services or materials for the Project or such Section and a certificate in the form attached hereto to the effect that all labor used on or for the Project or such Section has been paid and that all such releases have been submitted to the Owner.

C. PAYMENTS TO MATERIALMEN AND SUBCONTRACTORS

The Contractor shall pay each vendor, and each subcontractor, if any, within five (5) days after receipt of any payment from the Owner, the amount thereof allowed the Contractor for and on account of materials furnished or construction performed by each vendor or each subcontractor.

ARTICLE V -- PARTICULAR UNDERTAKINGS OF THE CONTRACTOR

A. PROTECTION OF PERSONS AND PROPERTY.

Contractor shall at all times take all reasonable precautions for the safety of its employees and of the public, and shall comply with all applicable provisions of Federal, State and local safety laws, building and construction codes, Installation guidelines, and Owner safety rules and requirements.

In addition to the above requirements, Owner expects and Contractor agrees to abide by the following requirements:

1. The Contractor shall so conduct the construction of the Project as to cause the least possible obstruction of all Roadways.
2. The Contractor shall provide and maintain all such guard lights and other protection for the public as may be required by applicable statutes, ordinances and regulations or by local conditions.
3. The Contractor shall do all things necessary or expedient to properly protect any and all highways and any and all property of others from damage, and in the event that any such highways or other property are damaged in the course of the construction of the Project the Contractor shall at its own expense restore any or all such damaged property immediately to as good a state as before such damage occurred.
4. The Project, from the commencement of work to completion, or to such earlier date or dates when the Owner may take possession and control in whole or in part as hereinafter provided, shall be under the charge and control of the Contractor and during such period of control by the Contractor all risks in connection with the construction of the Project and the materials to be used therein shall be borne by the Contractor. The Contractor shall make good and

fully repair all injuries and damages to the Project or any portion thereof under the control of the Contractor by reason of any Act of God or other casualty or cause whether or not the same shall have occurred by reason of the Contractor's negligence. The Contractor shall hold the Owner harmless from any and all claims for injuries to persons or for damage to property happening by reason of any negligence on the part of the Contractor or any of the Contractor's agents or employees during the control by the Contractor of the Project or any part thereof.

5. Any and all excess earth, rock, debris, underbrush and other useless material shall be removed by the Contractor from the site of the Project as rapidly as practicable as the work progresses.
6. Upon violation by the Contractor of any of the provisions of this Section, after written notice of such violation given to the Contractor by the Engineer or the Owner, the Contractor shall immediately correct such violation. Upon failure of the Contractor so to do the Owner may correct such violation at the Contractor's expense: Provided, however, that the Owner may, if it deems it necessary or advisable, correct such violation at the Contractor's expense without such prior notice to the Contractor.
7. The Contractor shall submit to the Owner monthly reports in duplicate of all accidents, giving such data as may be prescribed by the Owner.
8. The Contractor shall not proceed with the cutting of trees or clearing of right-of-way without written notification from the Owner that proper authorization has been obtained.

B. INSURANCE.

Contractor agrees to maintain insurance of the types and with limits of liability not less than those set out below at its expense during the term of this agreement and must provide for a sixty (60) day prior notice of cancellation, non-renewal or material change of the policies. Failure to furnish satisfactory evidence of insurance or lapse of policy is a material breach of the contract and grounds for termination of this agreement. Each policy shall be endorsed with a waiver of subrogation in favor of the Owner. All other insurance policies required of the Contractor by this agreement shall be endorsed to provide that such insurance shall apply as primary insurance and that any insurance or self-insurance carried by the Owner will be excess only and will not contribute with the insurance required by this agreement. All other insurance policies required of the Contractor and subcontractors by this Agreement shall be endorsed to name the Owner as additional insured. All insurance shall be on an occurrence from acceptable to the Owner and having an A.M. Best rating of "A" or better.

1. Commercial General Liability Insurance or Excess Liability Insurance
Contractor is required to provide Commercial General Liability (CGL) insurance with limits not less than \$3,000,000 combined single limit per

occurrence and \$5,000,000 in the aggregate not excluding premises operations, independent contractors, products, and completed operations, broad form property damage, blanket contractual, explosion, collapse and underground hazards. Limits may be a combination of primary and excess (umbrella) policy forms. Contractor shall name Doyon Utilities as an additional insured on Contractor's umbrella policy.

2. Worker's Compensation

Contractor will provide Workers' Compensation Insurance as required by AS 23.30.045. The coverage shall be in the amount no less than \$500,000 each accident for bodily injury, \$500,000 policy limit for bodily injury by disease and \$500,000 each employee for bodily injury by disease. The Contractor shall be responsible for Workers' Compensation Insurance for any subcontractor who directly or indirectly provides services under this contract. This coverage must include statutory coverage for states in which employees are engaging work. If there is an exposure of injury to Contractor's employees under the U.S. Longshoremen's Harbor Workers' Compensation Act, the Jones Act, or under laws, regulations or statutes applicable to maritime employee, coverage shall be included for such injuries or claims.

3. Automobile Liability Insurance

Contractor shall obtain and maintain Automobile Liability Insurance, covering owned, hired, and non-owned vehicles, for all self-propelled vehicles to be used in connection with the contract. The minimum combined single limit must be at least One Million dollars (\$1,000,000) per accident for bodily harm (including death) and property damage.

4. Property Insurance

If applicable, the Contractor shall submit to Doyon Utilities evidence of All Risk Builder's Risk Insurance for all physical loss, including earthquake and flood (100% completed value basis) upon the entire work naming the Doyon Utilities, the Contractor and the subcontractors as additional insured parties and as their interests may appear to the full contract sum thereof, until the project is completed by the Contractor and accepted by Doyon Utilities. The policy, by endorsement, shall specifically permit partial or beneficial occupancy at or prior to substantial completion or final acceptance of the entire work.

5. PROOF OF INSURANCE/CERTIFICATES OF INSURANCE

The Contractor shall furnish Doyon Utilities with a Certificate of Insurance or where requested by Doyon Utilities, the policy declaration page with required endorsements attached thereto showing the type, amount, effective dates and dates of expiration of all policies. All endorsements shall reference policy number and the project name and project number. The Owner is

Doyon Utilities, LLC and is to be identified on all certificates and endorsements.

Without limiting its indemnification, the Contractor shall maintain, until acceptance of the project by the Owner, occurrence type coverage of the kinds and minimum amounts set forth above. All insurance limits are minimum. If the Contractor's policy contains higher limits, the Owner shall be entitled to coverage to the extent of such higher limits. The Owner, at its sole discretion, may rise or lower the limit.

C. DELIVERY OF POSSESSION AND CONTROL TO OWNER.

1. Upon written request of the Owner the Contractor shall deliver to the Owner full possession and control of any portion of the Project provided the Contractor shall have been paid at least ninety percent (90%) of the cost of construction of such portion. Upon such delivery of the possession and control of any portion of the Project to the Owner, the risk and obligations of the Contractor as set forth in Article V, Section A(5) hereof with respect to such portion of the Project so delivered to the Owner shall be terminated. Provided, however, that nothing herein contained shall relieve the Contractor of any liability with respect to defective materials and workmanship as contained in Article II, Section E hereof. Subject to Article IV of this agreement.
2. Where the construction of a Section as defined in Article II, Section A(3) and Appendix 2 shall have been completed by the Contractor, the Owner agrees, after receipt of a written request from the Contractor, to accept delivery of possession and control of such Section upon the issuance of a written statement that the Section has been inspected and found acceptable by the Owner. Upon such delivery of the possession and control of any such Section to the Owner, the risk and obligations of the Contractor as set forth in Article V, Section A (5) and Article IV hereof with respect to such Section so delivered to the Owner shall be terminated. Provided, however, that nothing herein contained shall relieve the Contractor of any liability with respect to defective materials or workmanship as contained in Article II, Section E hereof.

D. TESTING THE PROJECT.

1. Prior to Completion of the Project the Owner, upon written notice to the Contractor, may test the construction thereof on a temporary basis. During the period of such test the portion or portions of the Project so tested shall be considered as within the possession and control of the Owner and governed by the provisions of Section C of this Article. Upon written notice to the Contractor by the Owner of the completion of such test and upon terminating temporary use of the construction involved therein said portion or portions of the Project shall be considered as returned to the possession and control of the Contractor

unless the Owner shall elect to continue possession and control in the manner provided in Section C of this Article.

2. The Owner shall have the right to use permanently any portion or portions of the Project delivered to its possession and control pursuant to the provisions of Section C of this Article.

E. ASSIGNMENT OF GUARANTEES.

All guarantees of materials and workmanship running in favor of the Contractor shall be transferred and assigned to the Owner prior to the time the Contractor receives final payment.

ARTICLE VI – REMEDIES

A. COMPLETION ON CONTRACTOR'S DEFAULT.

If default shall be made by the Contractor or by any subcontractor in the performance of any of the terms of this Proposal, the Owner, without in any manner limiting its legal and equitable remedies in the circumstances, may serve upon the Contractor and the Surety or Sureties upon the Contractor's Bond or Bonds a written notice requiring the Contractor to cause such default to be corrected forthwith. Unless within twenty (20) days after the service of such notice upon the Contractor such default shall be corrected or arrangements for the correction thereof satisfactory to both the Owner and the Administrator shall be made by the Contractor or its Surety or Sureties, the Owner may take over the construction of the Project and prosecute the same to completion by Contract or otherwise for the account and at the expense of the Contractor, and the Contractor and its Surety or Sureties shall be liable to the Owner for any cost or expense in excess of the Contract price occasioned thereby. In such event the Owner may take possession of and utilize, in completing the construction of the Project, any materials, tools, supplies, equipment, appliances, and plant belonging to the Contractor or any of its subcontractors, which may be situated at the site of the Project. The Owner in such contingency may exercise any rights, claims or demands which the Contractor may have against third persons in connection with this Contract and for such purpose the Contractor does hereby assign, transfer and set over unto the Owner all such rights, claims and demands.

B. CUMULATIVE REMEDIES.

Every right or remedy herein conferred upon or reserved to the Owner shall be cumulative, shall be in addition to every right and remedy now or hereafter existing at law or in equity or by statute and the pursuit of any right or remedy shall not be construed as an election:

C. INDEMNIFICATION.

The Contractor shall and does hereby agree to indemnify, hold harmless and defend the Owner, its affiliates, and respective officers, directors, attorneys, shareholders, employees, agents, successors and assigns, from any and all claims by a third party for losses, damages, costs, or liability, including reasonable expenses and attorneys' fees, arising from, in connection with, or relating to any of negligent acts or omissions or willful misconduct of Contractor, its agents, its personnel, or its subcontractors in the performance of its

obligations under this Contract, including but not limited to, those that cause bodily injury or death or physical damage to tangible property, all claims for service, labor performed, materials furnished, provisions and supplies, board of men, injuries to persons or damages to property, liens, garnishments, attachments, claims, suits, costs, attorney's fees, disclosure of Confidential Information, and costs of investigation and of defense. It is the intention of this paragraph to hold the Contractor responsible for the payment of and defense against any and all claims, suits, or liens of any nature and character, in any way attributable to or asserted against the Owner, or the Owner and the Contractor, of which the Owner may be required to pay. In the event the liability of the Contractor shall arise by reason of the sole negligence or willful misconduct of the Owner or the Owner's agents, or independent contractors other than the Contractor who are directly responsible to the Owner, then and only then shall the Contractor not be liable to the Owner under the provisions of this paragraph.

Promptly after receipt by Owner of any written claim or notice of action giving rise to a claim for indemnification, Owner shall notify Contractor and provide copies of the claim or any related documents. No failure to notify Contractor shall relieve Contractor of its obligation under this Contract except to the extent that the failure or delay is materially prejudicial to the Contractor's defense of such claim. Within thirty (30) days following receipt of such written notice, but in any event no later than ten (10) days before the deadline for any responsive pleading, Contractor shall notify Owner in writing (a "Notice of Assumption of Defense") if Contractor elects to assume control of the defense and settlement of such claim or action.

If Contractor delivers a Notice of Assumption of Defense within the required period, Contractor shall have sole control over the defense and settlement of such claim; provided, however, that Owner shall be entitled to participate in the defense of such claim and to employ counsel at its own expense to assist in the handling of such claim and Contractor shall obtain the prior written approval of Owner before entering into any settlement of such claim or ceasing to defend against such claim. After Contractor has delivered a timely Notice of Assumption of Defense, Contractor shall not be liable to Owner for any legal expenses incurred by Owner in connection with the defense, provided that Contractor shall pay for separate counsel for Owner to the extent that conflicts or potential conflicts of interest between the Parties so require. In addition, Contractor shall not be required to indemnify Owner for any amount paid by Owner in the settlement of any claim for which Contractor has delivered a timely Notice of Assumption of Defense if such amount was agreed to without prior written consent of Contractor, which shall not be unreasonably withheld or delayed in the case of monetary claims.

If Contractor does not deliver a Notice of Assumption of Defense within the required notice period, Owner shall have the right to defend the claim in such a manner as it may deem appropriate, at the cost and expense of the Contractor. Contractor shall promptly reimburse Owner for all such costs and expenses upon written request therefore.

D. FORCE MAJEURE

Either Party will be excused from delay in performing or from its failure to perform to the extent such delays result from causes beyond the reasonable control of such Party, including war, strike, riot, crime, or act of God (e.g. flooding, earthquake, or volcano), to the extent such delays or failures result from causes beyond the reasonable control of such Party, and provided that such failure could not have been prevented by reasonable precautions. The excuse does not apply to negligence or other malfeasance of a Party, or where non-performance is caused by the usual and natural consequences of external forces, or where the intervening circumstances are specifically contemplated. The Party whose performance has been delayed or prevented will act diligently to resume performance as soon as reasonably possible.

If the Contract is delayed or interrupted because of a force majeure event for more than thirty (30) consecutive days and Contractor cannot provide a temporary alternative acceptable to Owner, Owner may, at its option, terminate the affected portion of the Contract without liability by providing Contractor with a written notice of termination and paying Contractor for the portion of the Contract performed, and, at Owner's option, seek alternative performance of the remaining portion of the Contract.

E. LIQUIDATED DAMAGES

Should the Contractor neglect, refuse or fail to complete the construction within the time agreed upon, the Owner shall have the right to deduct from and retain out of such monies which may be then due, or which may become due, the sum of One Thousand Dollars for each calendar day such construction is delayed in its completion beyond the specified time, as liquidated damages and not as a penalty. This provision does not apply to written deadline extensions permitted pursuant to Article II, Section A above, or to extensions that are necessitated by *Force Majeure* as set forth in Section D above.

ARTICLE VII - - EMPLOYMENT AND RELATIONSHIP OF THE PARTIES

A. RELATIONSHIP OF THE PARTIES.

Nothing in this Contract shall be deemed to create a partnership, joint venture, or similar relationship between the Parties and no Party shall be deemed to be the agent of the other Party, it being understood and agreed that no provision contained herein shall be deemed to create any relationship between the Parties hereto other than the relationship of independent parties contracting for services. Neither party has or shall hold itself out as having any authority to enter into any contract or create any obligation or liability on behalf of, in the name of, or binding upon the other Party. Contractor's personnel are not Owner's agents or employees for federal tax purposes or any other purposes whatsoever, and are not entitled to any Owner employee benefits. Contractor assumes sole and full responsibility for employee conduct, and Contractor and its personnel have no authority to make commitments or enter into contracts on behalf of, bind or otherwise obligate Owner in any manner whatsoever. Contractor, and not Owner, is solely responsible for the compensation of personnel assigned to perform services hereunder, and payment of worker's compensation, disability and other similar benefits, unemployment and other

similar insurance, withholding income, social security, and other taxes, and paying the related employer contributions.

B. EQUAL OPPORTUNITY

The Contractor hereby certifies that it is familiar with and will comply with all provisions of Executive Order 11246, dated September 24, 1965 as amended by Executive Order 11375 dated October 13, 1967, and with the rules, regulations and relevant orders of the President's Committee on Equal Employment Opportunity created thereby.

C. EMPLOYEES AND SUBCONTRACTORS

Contractor and its personnel shall observe and comply with Installation security procedures and regulations, including but not limited to the general employee requirements for personnel working on the Installation in the attached Guidelines and as those requirements may be amended by the Installation from time to time, and requiring personnel to carry appropriate identification. If any Contractor personnel are found to be unacceptable to the Installation for any reason, or to Owner for reasonable cause, Contractor shall immediately take appropriate corrective action, including but not limited to termination of any assignment of Contractor work at the installation. Prior to Contractor's assignment of any personnel to perform work hereunder, Contractor agrees to take appropriate preventive steps that it reasonably believes shall insure that such personnel shall not engage in inappropriate conduct while on federal government property. Inappropriate conduct shall include, but is not limited to: being under the influence of alcohol, illegal drugs or any other controlled substances, except for approved medical purposes; the possession of a weapon of any sort, harassment, and/or threats of violent behavior.

D. DRUG ABUSE POLICY

Contractor shall comply with requirements for testing for the presence of alcohol and controlled substances required by Federal Department of Transportation and any federal, state or local laws, as applicable.

E. DAVIS BACON WAGES

Davis Bacon labor rates and requirements shall not apply to this Contract.

ARTICLE VIII -- MISCELLANEOUS

A. DESCRIPTION OF THE CONTRACT

This Contract, including the attached materials, constitutes the entire agreement between the Parties with respect to the subject matter hereof and supersedes all prior and contemporaneous representations, understandings or agreements, whether oral or written, relating to the subject matter thereof. The attachments to this Contract are incorporated into and are an integral part of this Contract, and include:

- (1) The Instructions for Proposals;
- (2) The "Bid Tab";
- (3) Doyon Utilities' System Design Manual (if provided);
- (4) Construction Unit Drawings and Specifications;
- (5) Owner Furnished Material List and form Material Receipt;
- (6) The Contractor Bond Form;
- (7) Contractor's price schedule (Appendix 1);
- (8) Contractor's construction schedule (Appendix 2);
- (9) Installation Requirements for Employees, and as those requirements may be changed by the installation from time to time (Appendix 3);
- (10) Organizational Conflict of Interest (Appendix 4); and
- (11) The ARRA Reporting Form (Appendix 5).

With the exception of the Installation Requirements for Employees, the Organizational Conflict of Interest form, and the ARRA Reporting Form, in the event of any conflict between the attachments and the terms of this Contract, the terms of the Contract shall control. In the event of any conflict between the terms of the contract and the Installation Requirements as they may be amended, the Organizational Conflict of Interest form, and/or the ARRA Reporting requirements, and the terms of those attachments take precedence.

No amendment, supplement or waiver of this Contract shall be binding unless executed in writing by the Party to be bound thereby. No waiver of any of the provisions of this Contract shall be deemed or shall constitute a waiver of any other provisions (whether or not similar) nor shall such waiver constitute a continuing waiver unless otherwise expressly provided.

B. GOVERNING LAW

All questions concerning the validity, interpretation and performance of this Contract shall be governed by and decided in accordance with the laws of the State of Alaska, exclusive of its conflicts of laws principles. Any disputes arising from this Contract shall be brought in the state court of Alaska, Fourth Judicial District at Fairbanks.

C. CONTRACT COORDINATORS

Upon acceptance of the bid and execution of this Contract, each Party will notify the other Party of the name, business address, and telephone number of the person who will have primary responsibility for interfacing on its behalf with the other Party (the "Contract Coordinator"). The Contract Coordinators will be responsible for arranging all meetings, visits, and consultations between the Parties that are of a non-technical nature and monitoring all administrative matters arising under this Contract, including but not limited to change orders, equitable adjustments, and indemnification.

Either Party may replace its Contract coordinator by delivery of written notice of such change, signed by the Contract Coordinator of each Party. The notice will set forth the name, business address and telephone number of such replacement. Whenever under this Contract one Party is required or permitted to give notice to the other, such notice will be deemed given when delivered in hand; three (3) business days after the date mailed by the United States certified mail, return receipt requested, postage prepaid; or when transmitted via facsimile, and addressed as follows:

In the case of Contractor:

TAR/TSI CONSTRUCTION LLC
ATTN: JACON BERGMAN
PO Box 876229
WASILLA, AK
Facsimile: 907-687

In the case of Owner

Doyon Utilities, LLC
ATTN: _____
714 Fourth Avenue, Suite 201
Fairbanks, AK 99701
Facsimile: (907) 455-6788

D. CONFIDENTIAL INFORMATION

Contractor acknowledges that it has been furnished, may be furnished, may otherwise have received or have had access to, or will receive or have access to reports, data, or information that relates to Owner's past, present, or future customers, business, or other related information and data; Owner's marketing methods, programs and related data, or other written records used in Owner's business, including attorney-client or other privileged information or materials; compensation paid to other independent contractors and other terms of their engagement or contractual relationships; or any other confidential information of, about, or concerning the business of Owner, its manner of operations, or other data of any kind, nature or description (the "Confidential Information"). Contractor agrees to preserve and protect the confidentiality of the Confidential Information and all physical forms thereof, whether disclosed to the Contractor before this Contract is signed or afterward. In addition, except as set forth in this Contract or as otherwise required by law, Contractor shall not disclose or disseminate the confidential Information to any third party and shall not use the Confidential Information for its own benefit or for the benefit of any third party without prior written approval of Owners' President. Contractor further agrees to implement such measures as may be necessary to ensure that its staff, employees, and subcontractors shall be bound by the confidentiality provisions contained in this Contract. The foregoing obligations shall not apply to any information that is publicly known. Except as may be required by law or authorized in writing by Owner, Contractor

shall not issue news releases or grant press interviews related to Owner or this Contract during or after performance of this Agreement.

E. TITLE TO MATERIALS

Title to all materials, equipment, supplies, consumables, spare parts and other items purchased or obtained by Contractor for or on behalf of Owner shall pass immediately to and vest in Owner free and clear of all liens or encumbrances upon passage of title from the vendor or Contractor thereof. All materials, data and documents prepared or developed by Contractor or its employees, representatives, or subcontractors for performance of this Contract, including all designs, drawings, plans, specifications, reports and accounts shall belong to Owner. All such materials in whatever form, including electronic copies, shall be provided promptly to Owner upon completion of this Contract, or at such other times as Owner may direct.

F. SEVERABILITY

In the event any provision of this Contract is held to be unenforceable or invalid by any court of competent jurisdiction, the validity and enforceability of the remaining provisions of this Contract will not be affected and, in lieu of such invalid or unenforceable provision, there will be added automatically as part of this Contract one or more provisions as similar in terms as may be valid and enforceable under applicable law.

G. DEFINITIONS

1. The term "Engineer" applies to the Engineer, its assistants, and representatives, employed by Owner to provide engineering services for the Project.
2. The term "Project" shall mean the system, unit, or improvement, or portion thereof, described in the Plans and Specifications, Construction Drawings.
3. The term "Completion of Construction" or "Time of Completion" shall mean full performance by the Contractor of Contract obligations and amendments and revisions thereof except the Contractor's obligations in respect of (1) Releases of Liens and Certificate of Contractor under Article IV, Section B hereof, and (2) other final documents. The Certificate of Completion, signed by the Engineer and approved in writing by the Owner shall be the sole and conclusive evidence as to the date and fact of completion of the Project.
4. The term "Contractor" as applied before Owner's acceptance of this agreement pertains to a party submitting a proposal; as applied after acceptance of a proposal, the term applies to the Contractor with whom the Owner contracts.

H. INTERPRETATION OF HEADINGS.

The headings used herein are for ease of reference and are not dispositive or exclusive of the meaning intended in the associated sections.

I. PATENT INFRINGEMENT

The Contractor shall save harmless and indemnify the Owner from any and all claims, suits and proceedings for the infringement of any patent or patents covering any materials or equipment used in construction of the Project.

J. COMPLIANCE WITH STATUTES AND REGULATIONS

The Contractor shall comply with all applicable statutes, ordinances, rules, and regulations pertaining to the work.

K. FRANCHISES AND RIGHTS-OF-WAY

The Contractor shall be under no obligation to obtain or assist in obtaining any franchises, authorizations, permits or approvals required, except to the extent Contractor retains documents or information supporting Owner's attempt to secure same.

IN WITNESS WHEREOF, the parties have executed this Contract effective the day and year as sign below.

"01520 Temporary Construction Facilities and Controls: Existing Construction and Traffic Control Plans (Army Corps of Engineers Required Submittals) shall be utilized and no submittals were estimated. FTW 336A site has been fully operational for several weeks now and can be inspected as required by DU."

- You will need to provide DU with a copy of your government approved Construction and Traffic Control Plans including a memo describing any variation from the technical specification 01520 provided to you. Your traffic control plan must cover any additional work areas related to the FTW 336A Aircraft Storage Project. Should the plan as currently exists not meet the needs for this project, your estimate shall include all necessary plan modifications for DU acceptance.
- Agreed.

"01570 Storm Water Pollution Prevention Measures: Existing SWPP Plan and ADEC NOI will be utilized and no submittals were estimated."

- You will need to provide DU with a copy of your government approved SWPP. Your SWPP must cover any additional work areas related to the FTW 336A Aircraft Storage Project. Should the plan as currently exists not meet the needs for this project, your estimate shall include all necessary modifications to the SWPP for DU acceptance.
- Agreed.

"01577 Radioactive Materials Procedures: Existing procedures shall be utilized and no submittal was estimated."

- You will need to provide DU with a copy of your government approved existing procedures. Your existing procedures must cover any additional work areas/processes related to the FTW 336A Aircraft Storage Project. Should the procedures as currently written not meet the needs for this project, your estimate shall include all necessary modifications to appropriate procedures for DU acceptance.
- Agreed.

"01780 Closeout: These submittals were estimated and will be transmitted to DU. Note: CADD drawings are required, however in 01330, 1.7 states that AutoCAD will not be provided for Contractor's use in preparing submittals. If that is the case, AutoCAD as-builts will not be provided."

- DU will provide CAD drawings where available prior to final contract agreement as appropriate.
- At this time TAR/TBI Construction is not going to supply Doyon with CAD drawings, if Doyon elects to have CAD drawings TAR/TBI will supply for an additional \$2500.00.

"02080 Asbestos Hazard Control Activities: Estimate includes Plan, Notifications, Air Monitoring, Mastic Abatement of 145 If utilidor and Utilidor Cleaning. Estimate does not include any insulation, pipe or lead abatement."

"02085 Lead in Construction: See above"

- If asbestos laden insulation is discovered, abatement of same shall be included in estimate along w/ mastic abatement.
- Design states that lead is expected in pipe support system throughout utilidor. DU expects estimate to include all required activities associated w/ discovery of lead in pipe support system.
- Agreed.

"02100 Field Screen of Soils for POL Contamination: Existing Plan shall be utilized. Note: The estimate does not include any handling, analytical testing, transporting, stockpiling, covering of any kind for any discovered POL or Contaminated Soil."

- You will need to provide DU with a copy of your government approved existing plan including a memo describing any variation from the technical specification 02100 provided to you. Your POL plan must cover any additional work areas related to the FTW 336A Aircraft Storage Project. Should the plan as currently exists not meet the needs for this project, your estimate shall include all necessary changes for DU acceptance. Handling contaminated material, if discovered, need not be included in your estimate. DU assumes added expenses associated w/ discovery of contaminated material as an additional project expense eligible for an equitable adjustment due to a differing site condition.
- Agreed.

"02200 Earthwork: Proctors and Sieves were estimated. Existing ESA Phase I assessments shall be utilized for borrow sources. Dewatering and Plan was not estimated. Shoring, bracing, or boxing of excavations was NOT estimated and moving/relocation of any underground/utilidor or piping or systems as well. Working under utilidor lids that cannot be removed will have a cost impact on estimated production rates."

- Dewatering and plan need not be included in your estimate. DU assumes added expenses associated w/ implementation of a written dewatering plan as a additional project expense that will be determined jointly and funded by DU. If the contractor encounters other previously unknown conditions, then the contractor may submit a request for an equitable adjustment due to a differing site condition.
- Contractor shall conduct site excavation according to all applicable safety requirements throughout the entire excavation for this project. This includes section 02200 of provided technical specifications and EM 385-1-1 Army Corps of Engineers Safety and Health Requirements Manual and OSHA where applicable. Moving/relocating underground/utilidor or piping systems is not a part of the scope for this project.
- It is DU's position that utilidor lids shall be removed per the IFC package as needed to complete necessary work.
- Agreed.

"03300 Cast-in-Place Concrete: This section was estimated. 3,000.00 for lid replacement/utilidor repair."

- DU agrees to your proposed \$1000/lid to replace broken lids provided we agree in the field on whether or not the excavator operator broke it. If Lids break that are obviously spalled (delaminated, or generally having exposed reinforcing bar), DU agrees that the pre-existing condition of the lid contributed to the failure, and, again, agrees to \$1000/lid.
- Agreed.

"03410 Precast Concrete: Not in Contract"

"05500 Misc. Metal Fabrications: This section was estimated. 8ea contractor supplied bollards, 4ea vents and DU supplies 2ea hatches. Estimated that 4 sleeves at the mechanical pit into the building are to be sandblasted steel with an epoxy coating in lieu galvanized."

- Noted
- Agreed.

"General Assumptions: DU supplied material will be on-site in a timely manner as to not impact contractors' schedule. DU supplied materials to be inspected and approved by both the contractor and DU. It is assumed that DU will be bracing/supporting the existing power pole on the southwest side of the project. It is assumed that the DU supplied direct bury water and sewer piping will be fully insulated. The existing Safety Plan and Quality Control Plan shall be utilized for the construction of this project. The existing requirements for insurance are 4,000,000 general aggregate and 2,000,000 each occurrence.

Pricing is based off of these requirements."

- Noted
- Agreed.

INSTRUCTIONS TO BIDDERS OR PROPOSERS

To be entitled to consideration Bids or Proposals must be made in accordance with the following instructions.

1. DEFINITION: INVITATION FOR BIDS VS. REQUEST FOR PROPOSALS

An Invitation for Bids (IFB) implies that if the Owner elects to award a contract, the Owner's intent, barring irregularities and/or unforeseen circumstances, is to award the contract to the lowest responsive and responsible Bidder.

A Request for Proposals (RFP) implies that all responsive and responsible proposals will be evaluated by the Owner via a process described in the RFP documents and if the Owner elects to award a contract, the Owner's intent, barring irregularities and/or unforeseen circumstances, is to award the contract to the Proposer whose Proposal is judged to best meet the Owner's requirements.

Hereinafter Bids and Proposals are referred to as "Offers"; Bidders and Proposers are referred to as "Offerors".

2. QUALIFICATION OF OFFERORS

An Offeror must have a valid Alaska Business License, required under AS 43.70, and must be registered as required under AS 08.18, at the time of the Offer deadline. The Alaska Business License and Contractor Registration numbers must be entered the Bid Form or Proposal Form. Within five (5) working days of the Owner's selection of successful Offeror, the selected Offeror shall provide copies of its valid Alaska Business License and Contractor's Registration to the Owner.

3. FAMILIARIZATION WITH REQUIREMENTS

Offerors shall familiarize themselves with all of the requirements of the Offer documents, including Instructions to Bidders or Proposers, Bid Form or Proposal Form, Construction Contract, Plans and Specifications. The documents may also include Special Conditions, Owner-furnished Materials List(s), Installation Guidelines for Employees, Staking Sheets, Construction Schedule with Major Milestones, American Recovery and Reinvestment Act (ARRA) Requirements, Organizational Conflict of Interest Form, Bid Bond Form, Performance Bond Form, Payment Bond Form, any addenda issued prior to the Offer deadline, and any other documents referenced or referred to therein.

4. EXAMINATION AND INTERPRETATION OF DOCUMENTS

Each Offeror shall examine all Offer documents carefully and shall make written requests to the Owner for interpretation or correction of any ambiguity, inconsistency, discrepancy, omission, or error therein which the Offeror may discover. Any interpretation or correction will be issued in an addendum by the Owner. Only a written interpretation shall be binding. No Offeror shall rely on any interpretation or correction given by any other method.

The intent of the Offer documents is to include only the requirements for materials, equipment, products, systems, standards and workmanship necessary for the proper execution and completion of the Work by the Offeror. The Offer documents shall not be construed to create an
