Subject: FTW 336A Utilities Contaminated Soil

Kathleen/Joe,

Per notification below we're now working under the contaminated site plan for project FTW-336A organized w/ Rockwell Engineering. I'll begin working out permissions/costs w/ DPW.

Thanks,
Wily

Wily,
We hit some contaminated soil during our excavation for the direct bury piping. Some PID readings are as high as 205. Work has been stopped and excavation cannot be completed. Please advise corrective action.

Thanks,
Scott

Gentlemen,
Per notification below, excavation for FTW-336A has entered into contaminated material. TAR/TBI has indicated to DU that they haven't enough room onsite to segregate contaminated material, however, they've already created a cell for contaminated material for a separate project. They've requested permission to use the same area for material from FTW-336A and are ready to negotiate costs.

Let's discuss at your earliest convenience...
I'll call ASAP.

Thanks,
Wily
