### JOB ACTIVITIES (Line Segments/Pole Numbers Inspected)

The deadend has been reinstalled.

The riser has been connected.

The padmount has been installed.

The main disconnect and CT can have been installed. No exceptions taken to installation.

The parking lot lighting poles have been installed. An adpator plate has been used to revise the bolt pattern to the poles that have been supplied. The adpator plate has been completed encased in grout to conceal the adaptor plate.
